It was during his studies in a renowned university that Dharypta stumbled upon the ancient texts that would change his life forever. These texts, believed to be written by a secret society called the Order of the World, revealed profound insights into the interplay between power, knowledge, and the fabric of reality itself.

The Order of the World, as revealed in Dharypta's research, is an organization that has existed for centuries, silently influencing major events and shaping the course of history. The members, known as the Keepers, are a select group of individuals with exceptional intellect, foresight, and a burning desire to mold the world according to their beliefs.

The Order's ideology revolves around the concept of universal balance – dabbling in the arts of alchemy, divination, and even time manipulation. They believe that by maintaining equilibrium between the forces of light and darkness, they can guide humanity towards its true potential.

However, whispers have started to emerge, hinting at a fractured Order, with factions vying for control and conflicting visions of the world's future.
