Security Concepts

1. What is the CIA triad? How does it relate to cybersecurity?

Alt attribute: The CIA triad represents the three fundamental principles of information security: confidentiality, integrity, and availability.

Answer: The CIA triad provides a framework for ensuring data security. Confidentiality refers to protecting data from unauthorized access, integrity ensures data integrity and prevents unauthorized modifications, and availability ensures that data and systems are accessible to authorized users when needed.

2. Define the concept of defense in depth and explain its importance in cybersecurity.

Alt attribute: Defense in depth emphasizes having multiple layers of security measures to protect against potential threats.

Answer: Defense in depth is a principle that involves implementing multiple layers of security controls to protect against various attack vectors. This approach minimizes the likelihood of a successful breach and ensures that, even if one layer fails, other layers are in place to safeguard sensitive information.

Compliance Management

47. What is the role of Data Loss Prevention (DLP) in compliance management?

Alt attribute: Data Loss Prevention (DLP) helps organizations prevent the unauthorized disclosure of sensitive information.

Answer: Data Loss Prevention (DLP) is a critical tool for compliance management. It helps organizations prevent the unauthorized disclosure of sensitive information, both at rest and in transit. With DLP, organizations can define policies and automated rules to protect sensitive data, ensuring compliance with industry regulations and internal policies.

48. How can organizations use Azure Sentinel for compliance management?

*Alt attribute: Learn how to leverage Azure Sentinel for streamlined compliance management.*

Answer: Azure Sentinel is a cloud-native Security Information and Event Management (SIEM) solution offered by Microsoft. It enables organizations to collect, analyze, and correlate security-related data from various sources, simplifying compliance management. By integrating Azure Sentinel with compliance standards such as GDPR or HIPAA, organizations can identify security gaps, detect potential threats, and ensure continuous compliance.

DOWNLOAD E-BOOK 📄

This book is designed to be an ancillary to the classes, labs, and hands on practice that you have diligently worked on in preparing to obtain your SC-900: Microsoft Security, Compliance, and Identity Fundamentals certification. I won't bother talking about the benefits of certifications. This book tries to reinforce the knowledge that you have gained in your process of studying. It is meant as one of the end steps in your preparation for the SC-900 exams. This book is short, but It will give you a good gauge of your readiness.

Learning can be seen in 4 stages:

1. Unconscious Incompetence

2. Conscious Incompetence

3. Conscious Competence

4. Unconscious Competence

This book will assume the reader has already gone through the needed classes, labs, and practice. It is meant to take the reader from stage 2, Conscious Incompetence, to stage 3 Conscious Competence. At stage 3, you should be ready to take the exam. Only real-world scenarios and work experience will take you to stage 4, Unconscious Competence.

I am not an author by trade. My goal is not to write the cleanest of a book. This book will get to the gist of things, no frills no thrills. The only purpose is to have the reader pass the SC-900 exam.
